E Replication Guidance

All work presented in this document can be replicated from the BEEM136 GitHub repository, which can be found at: <https://github.com/tb818/BEEM136>. **Please note, due to use of GitHub's Large File Storage (LFS) facility, it is recommended to follow the instructions outlined in the README to replicate the work, which have been tested.** The README best displays downloaded as a markdown file in VS Code.

F Code Outputs

This appendix provides a complete list of expected outputs.

Note on Pipeline and Outputs. This project has been completed with the view for further development. Consequently, some of the constructed variables and outputs have not been used for analysis, but have been created to allow for flexibility in future work.

Whilst all figures have been generated and saved as PDFs, the maps included in this document are PNGs to reduce file size for ELE upload.
